Successfully combining career  
orientation and your studies

Funded by:

## Be prepared for a career in Germany

The Career Passport Programme is designed to help prepare international degree-seeking students to successfully apply for graduate-level jobs in Germany. It offers a structured and manageable preparation for the German job market that can be easily integrated into everyday study life.

## How does it work?

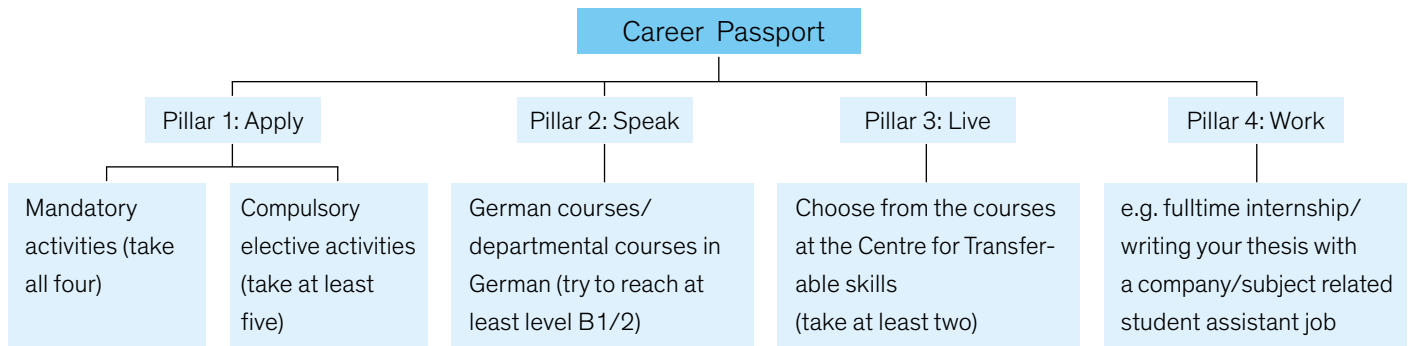

The Career Passport is built on four pillars: Application skills, German language skills, specialist and interdisciplinary qualifications, and practical experience in industry or business. You complete four mandatory and different elective activities. At the end you receive a certificate listing your achievements.

## This programme will help you to

- integrate your career orientation into your studies
- meet prospective employers at fairs, networking events or through job shadowing
- prepare effective application documents

## We support you by

- offering a number of activities to choose from every semester
- providing regular email updates
- offering advice on career orientation and application processes

Open to all international degree seeking students.
