

Risk Assessment for Infection Protection from SARS CoV-2 at Events and Examinations

PREVIOUS NOTE

In the future, risk assessments are only to be carried out for events and examination situations that you consider to be particularly at risk of infection (e.g. long periods of close contact or loud talking in indoor rooms that may not be well ventilated or need to be ventilated). For such situations, you can continue to use risk assessments to provide specific protective measures (e.g., mandatory masks, hygiene measures). Please keep these risk assessments signed by you (if your department has no other regulations). They no longer need to be uploaded to the cloud folders previously provided for this purpose.

I. SCOPE OF VALIDITY

Purpose / scope of the risk assessment*		Valid on / from - until
Department / Working group		
Responsible person/supervisor		
*E.g. event, test, etc.		

II. MEASURES

Measures
<i>Note: You can define your own measures for your area / event as part of this risk assessment. We recommend hygiene measures such as regular ventilation, keeping a distance (as far as possible) and wearing a mask, surface disinfection, etc.</i>
